

MUNICIPAL DISTRICT OF GREENVIEW No. 16

FOR IMMEDIATE RELEASE

Council Meeting Highlights

July 11, 2017

Bylaw 17-784 Schedule of Fees

Council gave Bylaw 17-784 a second reading and requested changes regarding the cost of items in the rental equipment fleet. The Schedule of Fees defines the amount which the MD of Greenview may charge for the supply of information, goods and services.

Grovedale Fish Pond

Council directed Administration to add \$154,039.24 to the 2017 Capital Budget to cover future upgrades to the Grovedale Fish Pond, with funds to come from the Project Carry Forward Reserve.

Strategic Plan

Council adopted the 2017 Strategic Plan as presented. The document outlines Greenview's strategic goals, including strategies for future infrastructure, regional cooperation, development, quality of life, and inter-government relations. Council highlighted the importance of also working together with developers in order to diversify Greenview's economy.

This plan will be utilized during the upcoming budget processes.

Grande Cache Doctors

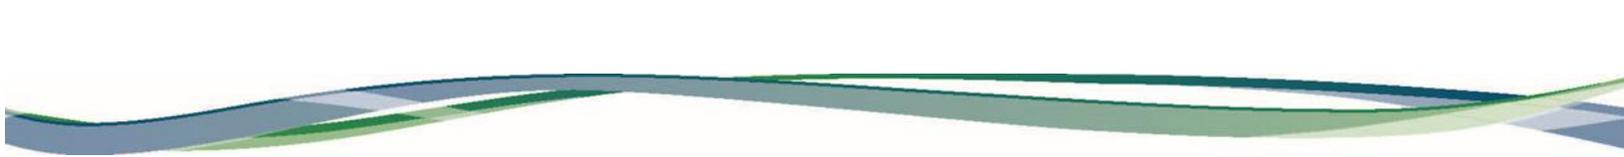

Council directed Administration to work with the Town of Grande Cache towards the creation of an agreement regarding medical clinic operations in the Town of Grande Cache. Greenview has similar arrangements with other partner municipalities and the agreement would be structured in a comparable manner. Costs to maintain a level of quality medical service for ratepayers in the Grande Cache area would be shared between the Town and the MD in a similar way that is currently arranged in clinics located in Valleyview and Fox Creek.

Council also motioned to direct administration to arrange a meeting between the joint councils to discuss the matter, ideally while Greenview's Council will be in Grande Cache for the prescheduled Committee of the Whole meeting on July 18th.

Sturgeon Area Water Point Potential Locations

Council denied the motion for exploration of an alternate location for a proposed water point in the Sturgeon Lake area. Council was informed of the treatment processes required in the area, which includes the proposed water point, according to the current water quality test results. Test wells are used to determine that the source has the water quality necessary and what treatment methods are required.

Council carried the motion to direct administration to prepare an estimate associated with building a water point with a reverse osmosis system in comparison to a water storage point with water supplied via trucking.

Events and Meetings

- Regular Council Meeting: July 25 and August 22, 2017
