Re: Highway 40 Transportation Network Review Study, Norbord Access to South of Kakwa River

Alberta Transportation has retained CastleGlenn Consultants Inc. to undertake an assessment of the Highway 40 corridor to determine the short-term improvements that would improve traffic safety and to identify the long-term corridor requirements necessary to protect the integrity of the highway corridor. The study will include a review of existing and future traffic operations, roadway geometrics, historic/archeological/heritage resources, environmental, geotechnical, drainage, structural and hydrological characteristics.

As part of the planning process, CastleGlenn Consultants will be hosting an interactive online Zoom engagement session concerning the first phases of the study. The purpose of this session is to provide an opportunity to meet and share information with residents, businesses and property owners. Participants are encouraged to engage in a discussion with the project team, provide comments, identify concerns and assist the study process by providing additional information. The meetings also provide our firm with the opportunity to familiarize all concerned with the study process and supplement the study with information provided from those parties most affected

The Zoom meeting will include a consultant presentation, interjected by discussion period with attendees arranged in an informal, round-table format where participants are encouraged to provide comments and identify potential concerns of individuals and the community as a whole.

CastleGlenn Consultants would like to invite you to pre-register (not required) to attend the Zoom virtual engagement session at the following date and link:

Date: Tuesday, June 15th, 2021
Pre-Register at: *Highway40.ca*
Time: 6:00 pm

We have attempted to contact all landowners, employers, businesses and residents who may be affected by this planning project. Should you be aware of other individuals or groups that may have an interest in this project, please advise them of this upcoming online open Zoom engagement session.

Should you have any questions or need more information, please feel free to contact Jake Berube or myself at (855) 857-9303. We look forward to seeing you at the virtual meeting.

Sincerely,

Arthur E. Gordon, B.A., P.Eng.
