

MUNICIPAL DISTRICT OF GREENVIEW

July 20, 2022

Attention: Hamlet Residents

RE: Next Steps for Residents of Grovedale, East Grove, Ferns Grove & Landry Heights

Residents who have completed an application form and paid the required fees can begin to finalize their connection by picking up a meter for installation from the Grovedale Public Service Building. Please refer to the Information update notice for more information about the meters.

Once all private connections/installations are completed and you are ready for your water service to be turned on at the property line you can contact the Grovedale Public Service Building at 780-524-6085. Your contact information will be collected, and a utility operator will contact you to set up an appointment to turn your service on and inspect your meter. If you have previously requested a meter inspection the Utility Operators will be in touch to schedule an appointment.

Inspections will be scheduled between the hours of 9:00a.m. and 3:00p.m. Monday thru Friday excluding weekends and holidays.

- The water shut off valves at the property line (or cc's) are the property of the MD of Greenview and are not to be operated by anyone other than Greenview staff that have been directed to.
- No private well or other source of water can be connected to the municipal water service line. If you choose to retain your well for outside purposes, please note as per By Law 11-664 *"No person is permitted to connect, cause to be connected, or allow to remain connected to any piping, apparatus, fitting, fixture, container, appliance or process in a manner which under any circumstances allows backflow of any material or substance into the Municipal Water System."*
- Due to project delays Greenview **will not** be charging Grovedale and Landry Heights Residents the Water Connection Fee of \$50 as laid out in the Schedule of Fees Bylaw 21-873.

Respectfully,
Doug Brown
Manager, Environmental Services
